### Bringing the Power Back to Staff with Unit **Based Councils** Session #C809

2015 ANCC National Magnet Conference October 8th 8-9am Kaycee Shiskowsky, MBA, BSN, RN-BC-Nurse Manager University of Colorado Hospital

### Discussion Plan

- History/renewed focus on shared leadership
- Haven's Decisional Survey
- Setting the Framework for UBC's
- SBAR process
- Insights into Barriers and Success's
- Data Analysis

## Demographics\*

- · Academic medical center
- Not-for-profit
- · Quaternary referral center
- · Level II trauma center
- 611 Licensed Beds • 5,761 Employees
- 2,000 RNs
- · 28.621 Admissions
- 90,983 ED Visits
- · 836,259 Clinic Visits

- 88% BSN or higher rate
- · 53% Certification rate
- · 111 articles in peer reviewed
- 272 local /national presentations
- 966 members of professional organizations
- · 769 RNs on committees
- >300 projects

# University of Colorado Hospital Located in Aurora, Colorado

- · Level II trauma center
- Has 551 licensed beds
  - 5,761 Employees
  - 2,000 RNs
  - 28,621 Admissions
  - 90,983 ED Visits
  - 836,259 Clinic Visits
- 12 Medical Surgical Units • 8 ICU Units/2 Progressive Care. Units
- 769 RNs on committees
- Recently achieved our 4<sup>th</sup> designation as a Magnet hospital
- #1 ranked hospital in Colorado by the US News & World report for the past 3 years

Nurse Stephanie

**UCHealth** 

- · Empowers frontline staff to be involved in decisions affecting their work environment
- · Enriches interdisciplinary relationships on unit level.
- · Identifies unit & staff level barriers to quality, patient experience, outcomes, efficiency; work together on improvements
- · Enhances communication between the unit and executive levels, streamlining the dissemination of information to the individual.
- · Strengthens best practices, information sharing across organization and system.

• UCHealth
------------

### **UBC's Support the Magnet Components**

- Transformational Leadership: Clinical nurse involvement with meeting mission, vision, and strategic plan, organization decision making, guiding nurses through change, change in the nurse practice environment, patient experience and nursing practice.

  Professional Development: Clinical nurses involved with interprofessional decision making, encourages professional development, improve the nurses expertise, and address strategic priorities.

  Exemplary Professional Practice: Clinical nurses are involved and interact with the professional practice model, care delivery system, standards of practice, interprofessional care, culture of safety, and especially the staffing, scheduling and budget process.
  - Specifically Autonomy is supported through the organizations shareddecision making structure.
- New Knowledge, Innovations and Improvements: Clinical nurses are engaged in nursing research, evaluating evidence based practice, improvements in workflow and efficiencies, and potentially create new initiatives that utilize innovation and technology.

4 U	CHealth -			

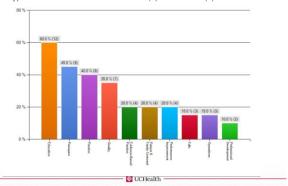

### Unit Council Survey 2013:

Does your unit/clinic have committees or councils?

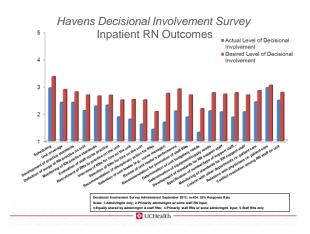

Types of active unit/clinic committee(s) and council(s)

### Haven's Decisional Involvement Scale

- Two part 21 item scale-Evaluates staff nurse involvement in decisions and activities of the unit.
  - Perceived actual level of staff nurse decisional involvement
  - Preferred levels of staff nurse decisional involvement
- · Valid and reliable
- The subscales:
  - Unit staffing
  - Quality of professional practice
  - · Professional recruitment
  - Unit governance and leadership
  - Quality of support staff practice
  - · Cooperation/liaison activities.

UCHealth -			

Our Unit's experience	
Pulmonary Unit:	
36 bed medical surgical unit	
Treat a variety of patients including Respiratory disease and complications. Pulmonary Hypertension, Thoracic Surgery, ENT patients, and Medical patients Ranked #2 in the U.S. News and World Report for Pulmonary.	
<ul> <li>90 staff (60RN's)</li> </ul>	
Designated Comprehensive Care Center for Pulmonary Hypertension	
Pulmonary Unit Based committee (PUB)	
Elections March-May 2014,	
June 2014-first meeting

## The First Meeting

- Expectations/bylaws
- ☐ Training-Skillful Discussion
- ☐ Accountability to Peers
- ☐ Havens Decisional Model
- ☐ Review mission, vision and values of the hospital
- ☐ Generate their ideas for priorities for this group to address
- ☐ Elect chairs/secretary

**⊕** UCHealth

# Decisional Involvement Survey: Pulmonary RNs # Actual Level of Decisional Involvement # Decisi

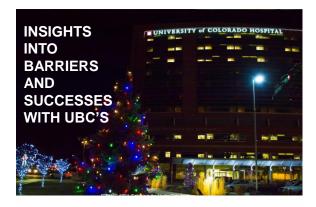

Create a tool to submit ideas/issues with recommendations	<ul><li>Name of Person Submitting:</li><li>Who needs to be involved:</li></ul>	
	<ul> <li>Situation: What is the issue, problem, or idea?</li> <li>Background: What is the clinical context, hospital policy, or standard of practice surrounding the issue?</li> <li>Assessment: What do YOU think the problem is? What is really happening?</li> <li>Recommendation: What would you do to correct or improve this?</li> </ul>	
	UCHealth	
SBAR for Seniority	Name of Person Submitting: Mijoo Who needs to be involved: Scheduler, Staff RN, Manager Situation: Some staff members are wondering why some staff are scheduled only on day shifts while other staff members are on rotating shifts. Background: There is no guarantee of shift preference, although this may be considered based on unit/department needs. Assessment It appears that some staff members are scheduled on day shifts based on experience as a nurse, not by senionity of the staff member on the unit. Recommendation: A waiting list to determine those who prefer to be on day shift and seniority of the staff member on the unit considered	
	<b>◎</b> UCHealth	
Pulmonary Seniority	Credentialing:  - Level II RN= 1 point - Level III RN= 4 points	
Point System  Engagement and Seniority System	Level IV RN= 6 points  Nursing experience     2-4 years= 2 points	
Seniority has its PRIVILEGES	- 5-6 years= 3 points - 7 + years= 4 points  Certifications: - ACLS = 1 point - Nursing-related (CMSRN, PCCN, Pain, etc)= 2 points  Other: - Related charge in the past year= 1 point - Preceptor in the past year= 1 point - Working on a unit project= 2 points - Hots a injurined (with = 1 point	
	- Host a journal club= 1 point - Committee involvement (>75% participation)= 1 point - Unit specific conference= 1 point Experienced new hires will rotate days and nights for 6	
	Experienced trew times will ordize dups after intigins for or months then they can be assigned seniority as above. If two nurses has the same seniority score, priority will be given to the nurse who was hired to Pulmonary as a nurse first.	

UCHealth —

Example of SBAR's Items	
Bath's and Walking not consistent. (Kelsi G): CNA's are just too busy with primary care to get to consistent bath's and walks as needed by our patients.  Acuties: Created routine services and average acuity scores for better assessment of workload acuity.  Nourishment room PAR levels (Nights/Weekends):  Phone calls: Need for triaging calls prior to going to the nurse. Working with other departments to ensure they are calling the right person first-MRI, Dialysis, Radiology, Operator, Pharmacy, Tele. Evaluation/Audit of a typical day of calls: Phone log via the phone and ID inappropriate nursing calls. Evaluate PSC time  Lunch Breaks: Previous survey stated 60% of staff do not want to give up phone. Potential for rerouting calls during lunches. Discover other strategies that would work to decrease patient needs and phone calls during specified 30 min break for lunch.  Input/Output consistent charting: Steph H created a new process and is doing one on one teaching  Leadership Hiring: Hired Associate Manager and Educator, soon to come charge nurse?  Flu Shot Shortages:  Cancel Calendar  Shortage of Wall Suction and canister holders:	
Magnet Examples  Transformational Leadership: Change in the nurse practice environment Change in the patient experience and nursing practice Example: Changing the CNA structure on the unit-Baths and Walks, Blanket Warmers, Admission Bundle Professional Development: Clinical nurses involved with inter-professional decision making Encourages professional development Example: Changing nourishment room PAR levels, Flu shot shortages, UBC shared decision making training and Chairperson Facilitation Training.	
Magnet Examples  - Exemplary Professional Practice: - Clinical nurses are involved and interact with the professional practice model and care delivery system, - Staffing, scheduling and budget process Example: Seniority scale, Pulmonary Hypertension clinic sharing, Cancel Calendar  - New Knowledge. Innovations and Improvements: - Clinical nurses are engaged in nursing research, evaluating evidence based practice Improvements in workflow and efficiencies, and potentially create new initiatives that utilize innovation and technology Unit Example: Glucose management research study, Input and output documentation/roles	

## Closing the Loop

ortage of Wall ction-In the process ordering nch Breaks: waiting survey results	
abetes Sliding Scale search project: aiting for IRB approval	
	one calls: Evaluation inappropriate RN calls til August 10 <sup>th</sup> .

**UCHealth** 

We have a committee, now what do we do?

Generating ideas/issues First go to Haven's, find the largest discrepancy, or an area that staff desired decision making ability Inquire to staff

- Process that doesn't work
- Survey/Opinion/Feedback
- Idea board
- SBAR
- Complaints-but need to have a recommendation
- Magnet criteria
- Manager's can bring issues

### Diving into the problem

- Identify owners (either a UBC member or the submitter)
- Chairs need to evenly distribute/delegate tasks
- All staff may need to go back and ask their coworkers/get feedback.
- · With finalizing the recommendation: Every member is required to support and communicate the final decision (even if they didn't agree, but was not the majority)

UCHealth -

### Other Strategies For Success

- discussion
- Guide the manager on Dimensions of Decision making-what and how much delegation and authority should occur
- Peer to Peer teaching: Creating an accountability framework, similar to charge nurse org chart?
  - Responsible for teaching/sharing/presenting the recommendations
  - Responsible for promoting SBAR if they are having a complaint/process problem?
- Partnering with other UBC: ex RT's UBC with PUB
- · Invite patient and family to help us understand one of the most important perspectives
- Journal club on UBC literature
- Partner with Unit Champions to discuss action plans that need to be implemented

**UCHealth** 

### **UBC Training: Skillful Discussion**

- - What you are trying to accomplish
  - How that affects your thinking and speaking Balance advocacy and inquiry:
- Ask questions to gain understanding of all sides
   Build shared meaning
   Explore what others mean by their words
  - - Ask what all agree on and what they disagree on
       Pinpoint sources of disagreement, which are often:

      - Facts
         Methods

      - Goals
- Values
   Listen, Be open to new ideas, be willing to see others perspectives
   Ask: what is needed to move forward

**UCHealth** 

### Skillful Discussion

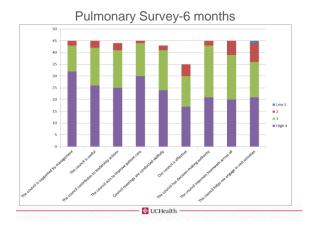

### What it is and is not

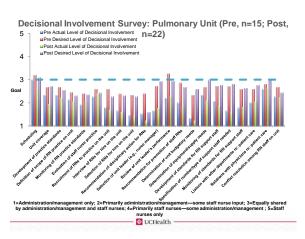

Raw Debate	Polite Discussion	Skillful Discussion	Dialogue
Argue it out	Talk about it, nicely	Come to closure on an issue	Explore, discover, gain insight

### **Decisional Involvement Survey:** Did we close the gap between actual and desired staff decision making?

Unit	Julcomes. Fum	ionary			
	N	Mean	SD	Range	P Value
PRE	15				
Actual		2.02	0.40	1.33 – 3.00	
Desired		2.65	0.25	2.33 – 3.27	p < .001
POST	22				
Actual		1.94	0.40	1.23 – 2.64	
Desired		2.60	0.35	1.59 – 3.09	p < .001

- Goal: close the gap between the actual and desired staff decision making. There should be no significant difference.

  T-tests were conducted between the Pre actual and desired decision-making mean scores and Post actual and desired decision-making mean scores.

  The gap did not improve (i.e., close) between 2013 and 2015 as shown by significant p < .001 values.

  Pulmonary Unit RNs perceived Actual decision-making declined in 14 of 21 items between pre and post time periods.

### What improved

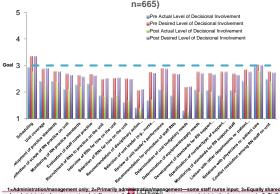

- Monitoring of RN Practice Standards and Evaluation of Staff Nurse Practice
- · Selection of Unit Leaders (Review of leaders performance)
- Monitoring of Standards for RN support staff
- · Liaison with other departments re: pt care
- · Relations with physicians re: patient care

### What didn't

- · Scheduling-
- · Unit Coverage/specification of number/type of support staff needed
- · Recruitment/Interview/Selectio n of RN's for hire on the unit.
- Determination of budgetary/equipment/supply needs
- Conflict resolution among RN staff on the unit/recommendation of disciplinary action/promotion of

**UCHealth** 

Decisional Involvement Survey: Inpatient RNs (Pre, n=424; Post, n=665)

# Decisional Involvement Survey: Did we close the gap between actual and desired staff decision making?

inpatient KN Outcomes							
	N	Mean	SD	Range	P Value		
PRE	424						
Actual		2.11	0.43	1.32 – 2.96			
Desired		2.71	0.27	2.08 - 3.36	p < .001		
POST	665						
Actual		2.04	0.38	1.31 – 2.79			
Desired		2.68	0.26	2.11 – 3.36	p < .001		

- Goal: close the gap between the actual and desired staff decision making. There should be no significant difference.
   Tetests were conducted between the Pre actual and desired decision-making mean scores and Post actual and desired decision-making mean scores.
   The gap did not improve (i.e., close) between 2013 and 2015 as shown by significant p < .001 values. Inpatient RN perceived Actual decision-making-decipied in, 18 of 21 terms between pre and post time periods.

### Thoughts on Results

- · Hospital wide changes reflect some loss of control, as reflected in the hospital survey
  - · Pay practice changes
  - · Scheduling software changes
- · Unit wide changes
  - · Loss of a full patient population to another hospital, replaced with new medicine population
  - 50% change in members, with two co-chairs taking other positions
  - New staff not involved in the pre-survey
  - · Accountability of the UBC's
  - Staff don't want any more projects/change
